

Version history for the LLNCS LaTeX2e class

date	filename	version	action/reason/acknowledgements
29.5.96	letter.txt	beta	naming problems (subject index file) thanks to Dr. Martin Held, Salzburg, AT
	subjindx.ind		renamed to subjidx.ind as required by llncs.dem
	history.txt		introducing this file
30.5.96	llncs.cls		incompatibility with new article.cls of 1995/12/20 v1.3q Standard LaTeX
	document class, Gough		\if@openbib is no longer defined, reported by Ralf Heckmann and Graham solution by David Carlisle
10.6.96	llncs.cls		problems with fragile commands in
	\author field		reported by Michael Gschwind, TU Wien
25.7.96	llncs.cls		revision a corrects: wrong size of text area, floats not
	\small, Tuebingen		some LaTeX generated texts reported by Michael Sperber, Uni
16.4.97	all files	2.1	leaving beta state, raising version counter to 2.1
8.6.97	llncs.cls	2.1a	revision a corrects: unbreakable citation lists, reported by Sergio Antoy of Portland State
	University		
11.12.97	llncs.cls	2.2	"general" headings centered; two new
	elements \homedir; environments: \spnewtheorem, environment; package; package		for the article header: \email and complete revision of special \newtheorem replaced with introduced the theopargself two column parts made with multicol add ons to work with the hyperref
07.01.98	llncs.cls	2.2	changed \email to simply switch to \tt
25.03.98	llncs.cls	2.3	new class option "oribibl" to suppress

environment			changes to the thebibliography
			and retain pure LaTeX codes - useful for most BibTeX applications
16.04.98	llncls.cls	2.3	if option "oribibl" is given, extend thebibliography hook with "\small", suggested by Clemens Ballarin, University of Cambridge
20.11.98	llncls.cls	2.4	pagestyle "titlepage" - useful for compilation of whole LNCS volumes
12.01.99	llncls.cls	2.5	counters of orthogonal numbered special environments are reset each new contribution
27.04.99	llncls.cls	2.6	new command \thisbottomragged for the actual page; indention of the footnote made variable with \fnindent (default lem); new command \url that copys its argument
2.03.00	llncls.cls	2.7	\figurename and \tablename made compatible to babel, suggested by Jo Hereth, TU Darmstadt; definition of \url moved (\AtBeginDocument (allows for url package of Donald Arseneau), suggested by Manfred Hauswirth, TU of Vienna;
16.04.00	llncls.cls	2.8	\large for part entries in the TOC
17.01.01	llncls.cls	2.9	new option "orivec" to preserve the vector definition, read "arrow" accent
20.06.01	splncls.bst		hardwired texts made polyglot, available languages: english (default), french, german - all are "babel-proof"
14.08.01	llncls.cls	2.10	public release of a BibTeX style for LNCS, nobly provided by Jason Noble
23.01.02	llncls.cls	2.11	TOC: authors flushleft, entries without hyphenation; suggested by Wiros Niessen, Imaging Center - Utrecht
			fixed footnote number confusion with \thanks, numbered institutes, and normal

			footnote entries; error reported by Saverio Cittadini, Istituto Tecnico Industriale "Tito Sarrocchi" - Siena
28.01.02	llncls.cls	2.12	fixed footnote fix; error reported by Chris Mesterharm, CS Dept. Rutgers - NJ
28.01.02	llncls.cls vacation)	2.13	fixed the fix (programmer needs
17.08.04	llncls.cls handling	2.14	TOC: authors indented, smart \and for the TOC suggested by Thomas Gabel University of Osnabrueck
07.03.06	splncls.bst patch University		fix for BibTeX entries without year; provided by Jerry James, Utah State
14.06.06	splncls_srt.bst feature Stuttgart		a sorting BibTeX style for LNCS, provided by Tobias Heindel, FMI Uni-
16.10.06	llncls.dem demo	2.3	removed affiliations from \tocauthor
11.12.07	llncls.doc mail address		note on online visibility of given e-
15.06.09	splncls03.bst current "Titto"		new BibTeX style compliant with the requirements, provided by Maurizio Patrignani of Universita' Roma Tre
30.03.10	llncls.cls	2.15	fixed broken hyperref interoperability; patch provided by Sven Koehler, Hamburg University of Technology
15.04.10	llncls.cls TOC entries; reported	2.16	fixed hyperref warning for informatory introduced \keywords command - finally; blank removed from \keywordname, flaw by Armin B. Wagner, IGW TU Vienna
15.04.10	llncls.cls by \backmatter; University of Potsdam	2.17	fixed missing switch "openright" used flaw reported by Tobias Pape,
27.09.13	llncls.cls solution provided Stuttgart	2.18	fixed "ngerman" incompatibility; by Bastian Pfleging, University of

04.09.17	llncs.cls	2.19	introduced \orcidID command
10.03.18	llncs.cls	2.20	adjusted \doi according to CrossRef requirements;
			TOC: removed affiliation numbers
	splncs04.bst		added doi field; bold journal numbers
	samplepaper.tex		new sample paper
	llncsdoc.pdf		new LaTeX class documentation
