HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

ERRATUM

Erratum: Analytical and numerical expressions for the number of atomic configurations contained in a supershell (2020 *J. Phys. B: At. Mol. Opt. Phys.* **53** [115002](#))

EDINBURGH INSTRUMENTS

WORLD LEADING MOLECULAR SPECTROSCOPY SOLUTIONS

edinst.com

The advertisement features a red background with the Edinburgh Instruments logo on the left, which consists of a stylized sunburst of white dots. In the center and right, several pieces of laboratory equipment are displayed, including a spectrometer labeled 'FSS' and another labeled 'FLS 1000'. The text 'WORLD LEADING MOLECULAR SPECTROSCOPY SOLUTIONS' is written in white, bold, sans-serif font. The website 'edinst.com' is shown in a white box in the bottom right corner.

-
- The sentence before equation (8) in section 2 should be ‘Indeed, let us take the example of four orbitals with degeneracy g_1, g_2, g_3, g_4 .’
 - The inline formula in the last sentence of section 6 is incorrect. One should read ‘Conversely, for a given g , one has $\lim_{N \rightarrow \infty} \kappa_4 / \sigma^4 = 0$, in agreement with the central limit theorem.’
