Submitted on 14 Nov 2024

HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

PLEIADES

Smarter Plant Decommissioning

PLEIADES: Main outcomes, evaluation and steps forward

M.-B. Jacques (coordinator), J. A. Ridao Cabrerizo, S. Gentes, D. Daniska, N. Delannay et al.

DigiDECOM23– Helsinki

25 October 2023

This project has received funding from the EURATOM Research & Training Programme 2014-2018 under the Grant Agreement n°899990. The content of this document reflects only the author's view. The European Commission is not responsible for any use that may be made of the information it contains.

Content

- Introduction
- Objectives
- Work plan
- Main outcomes
 - Ontology
 - PLEIADES Platform
 - Digital Models
- Use of Digital Models & Demonstration on Real Use Cases
- Further Steps

PLEIADES Overview

- **Platform based on Emerging and Interoperable Applications for enhanced Decommissioning processes**
- **Duration: 3 years (01/10/2020 - 30/11/2023)**

14 partners from 7 countries

3 Use Cases

PLEIADES: Objectives

✓ Develop an innovative platform based on a BIM approach

→ BIM (*Building Information Modelling*) approach to **design scenario**, **improve safety**, **minimize radiation exposure**, **optimize costs and planning**, **communicate**

PLEIADES Objectives

✓ Develop an innovative platform based on a BIM approach

→ BIM (*Building Information Modelling*) approach to **design scenario, improve safety, minimize radiation exposure, optimize costs and planning, communicate**

→ 3D modelling & simulation

→ “multi-dimensional modelling”: **3D model, time, dose, feasibility studies, waste and costs**

→ Software **integration** and **interoperability**

1. **3DScanPF (KIT)**: Robotic platform for 3D scans and imaging
2. **DIM (EDF)**: Dismantling Info Modelling system for storing all facility data
3. **Bimsync (CATENDA)**: IFC¹ compatible BIM platform used in construction
4. **iUS IMS (iUS)**: Semantic wiki based nuclear info system
5. **RadPIM (IFE)**: Radiological characterisation tool (part of VRdose family)
6. **VRdose (IFE)**: Detailed job planning tool with a radiological model library
7. **DEMplus (CYCLIFE DS)**: Decision-support tool combined with 3D simulation
8. **Aquila costing (WAI)**: ISDC² compatible client-server based costing tool
9. **iDROP (CEA)**: VR dismantling simulation with collision & radiological modelling
10. **WASTREAM : (Tractebel)**: Low Level Waste Activity Assessment tool
11. **ALVAR (VTT)**: AR³ training platform with advanced tracking capabilities
12. **INTERACT (LS)**: XR⁴ platform with physics engine

PLEIADES Objectives

✓ Develop an innovative platform based on a BIM approach

✓ Implement on real cases

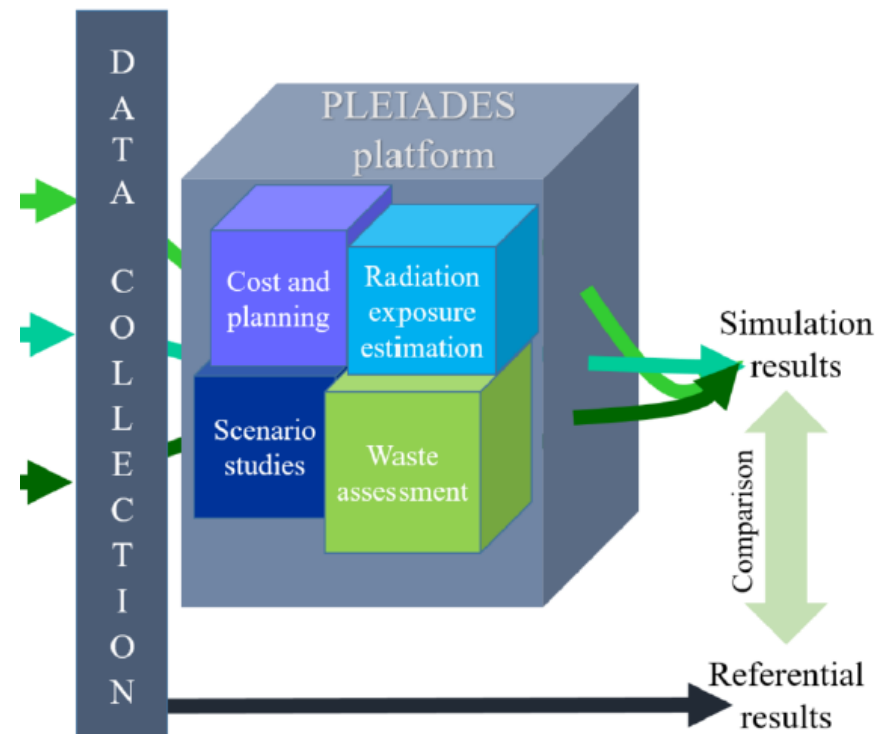

Santa María de
Garona (SMG)

Halden Research
Reactor (HRR)

Base Chaude O.
du Tricastin (BCOT)

PLEIADES Objectives

✓ Develop an innovative platform based on a BIM approach

✓ Implement on real cases

✓ Develop an associated methodology and prepare it as a standard

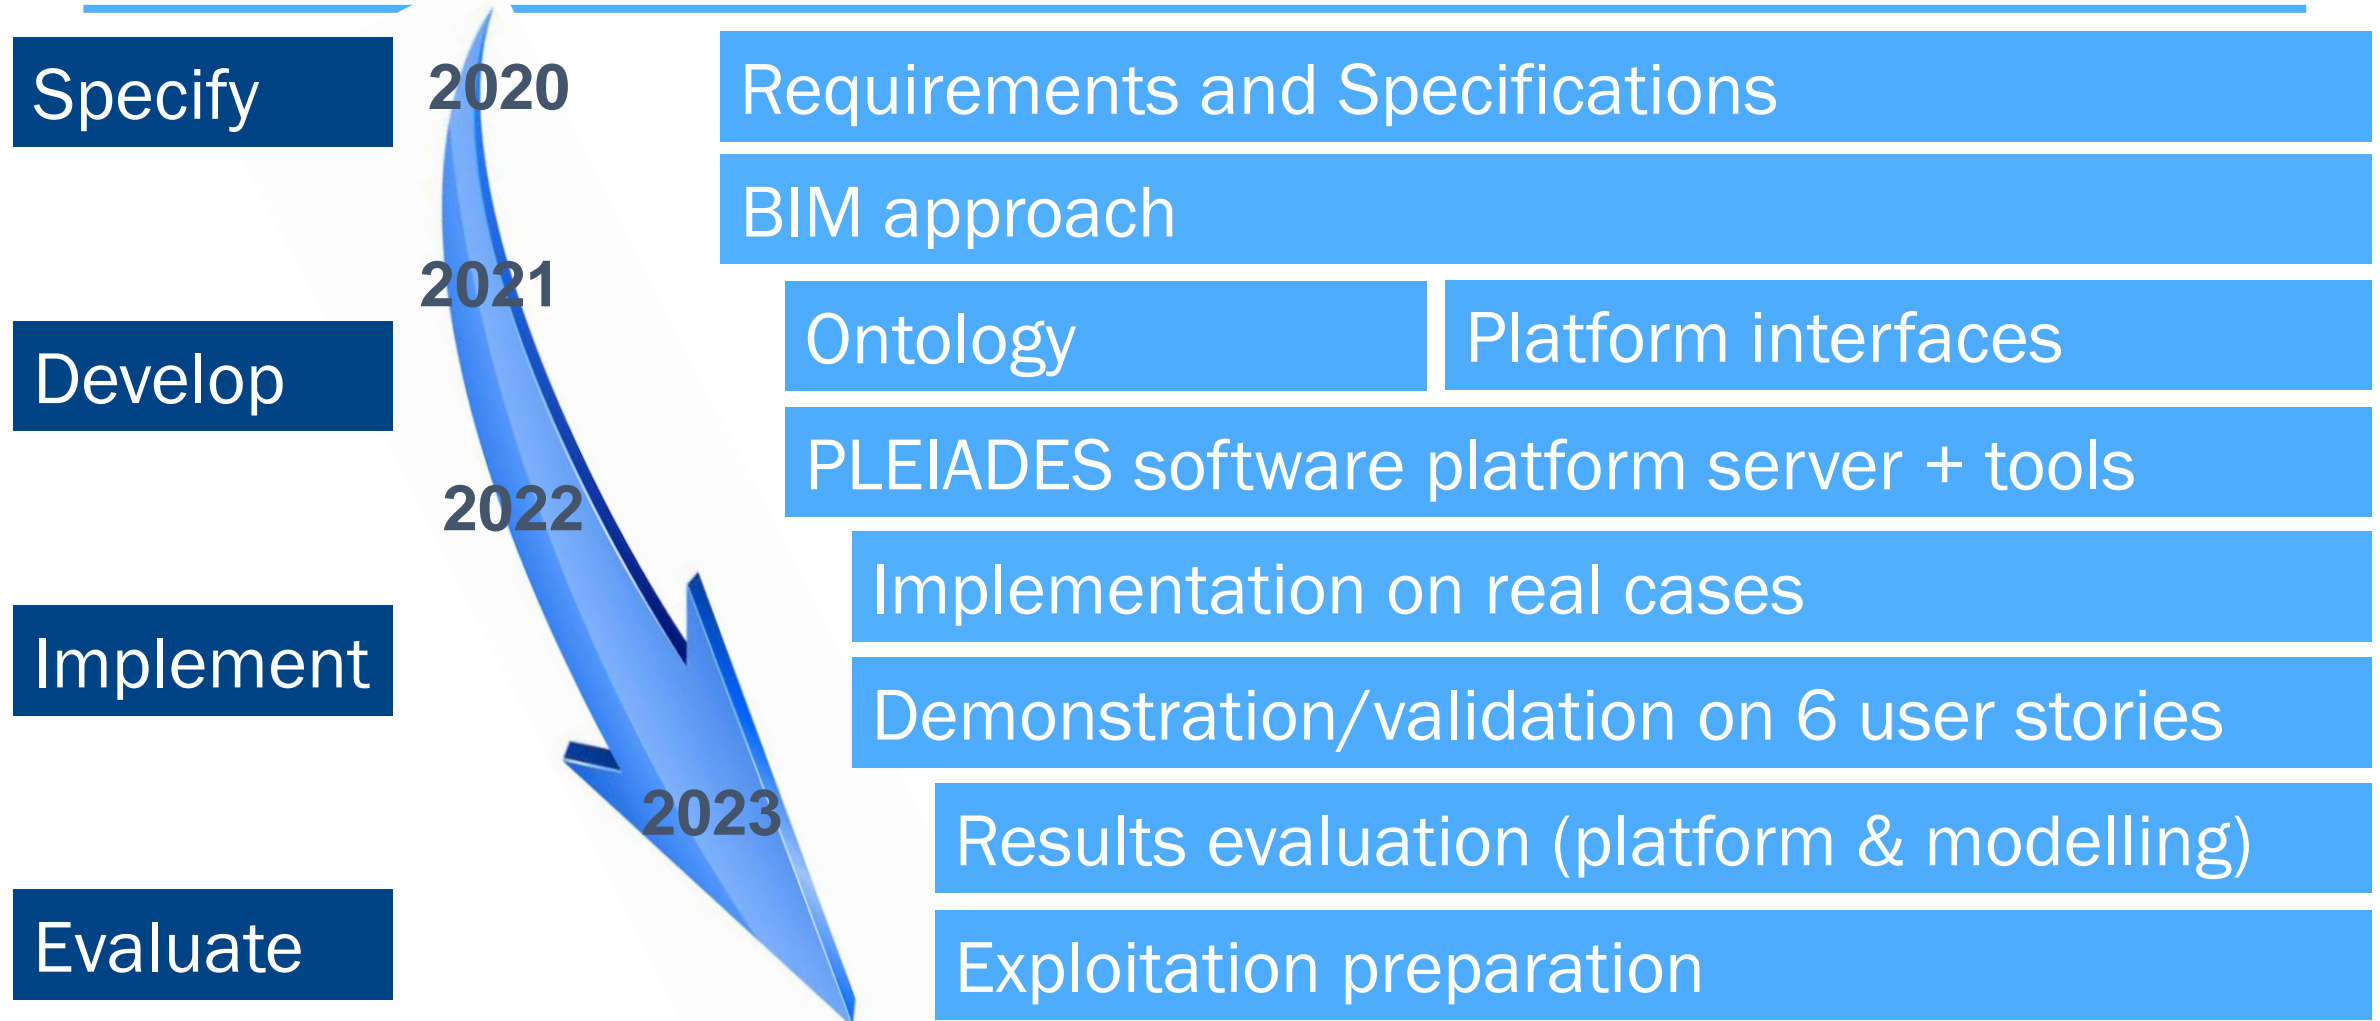

→ Establish a **standardized process** to organize the data collected consistent with BIM approach

→ Propose an **ontology** for an international standard:

- decommissioning specific terminology / vocabulary definition
- concepts relationships identification
- common understanding
- common knowledge modeling

PLEIADES Work plan

➤ End of project : November 2023

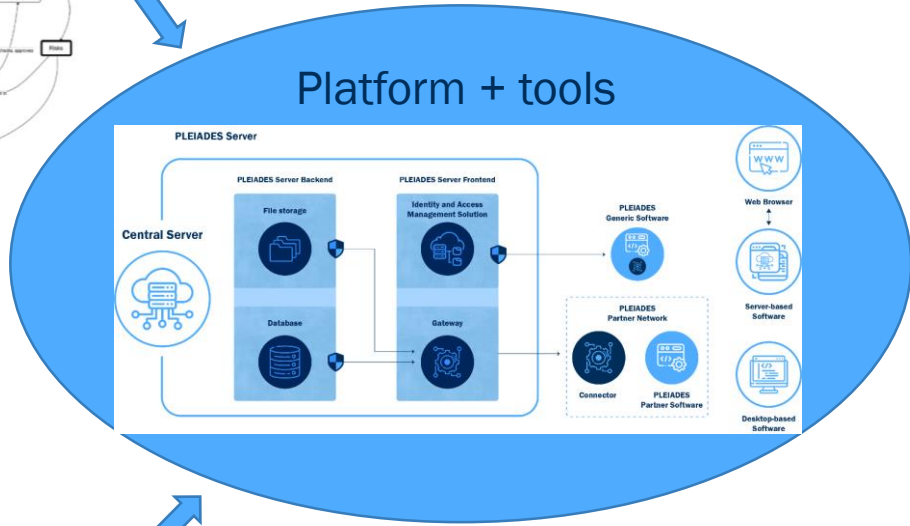

PLEIADES Outcomes overview

PLEIADES BIM-based concept

BIM (*Building Information Modelling*) approach to **design scenario**, **improve safety**, **minimize radiation exposure**, **optimize costs and planning**, **communicate**

Data collection based on decommissioning ontology

Scenario simulation

SMG

Estimations/Comparison/Decisions

- Waste management
- Dose exposure
- Cost
- Planning
- ...

3D models

HRR

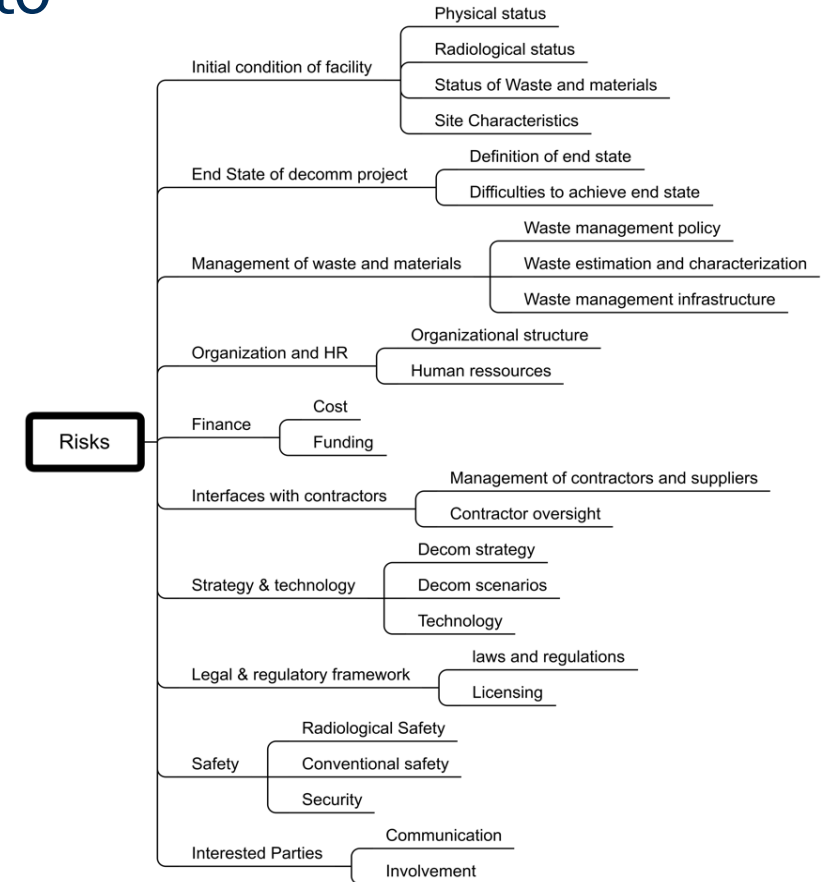

BCOT

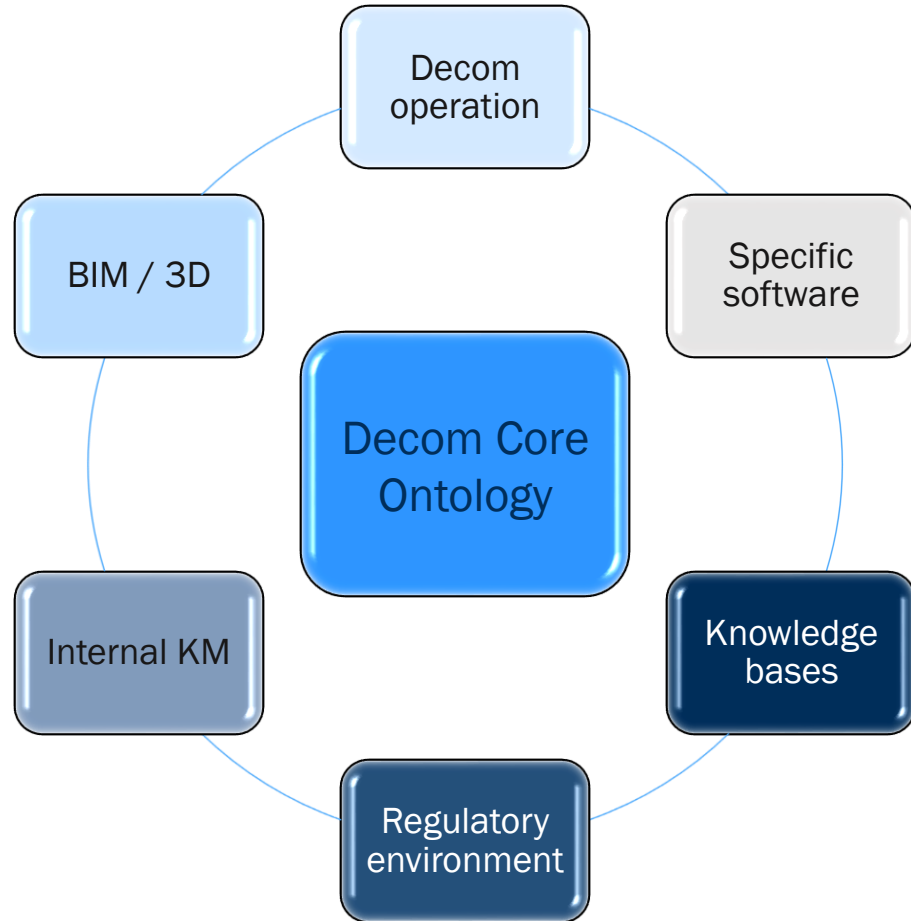

Ontology

- Achieve: common understanding + data compatibility
- Reuse ontology/taxonomy concept; extended to decommissioning process data

Ontology

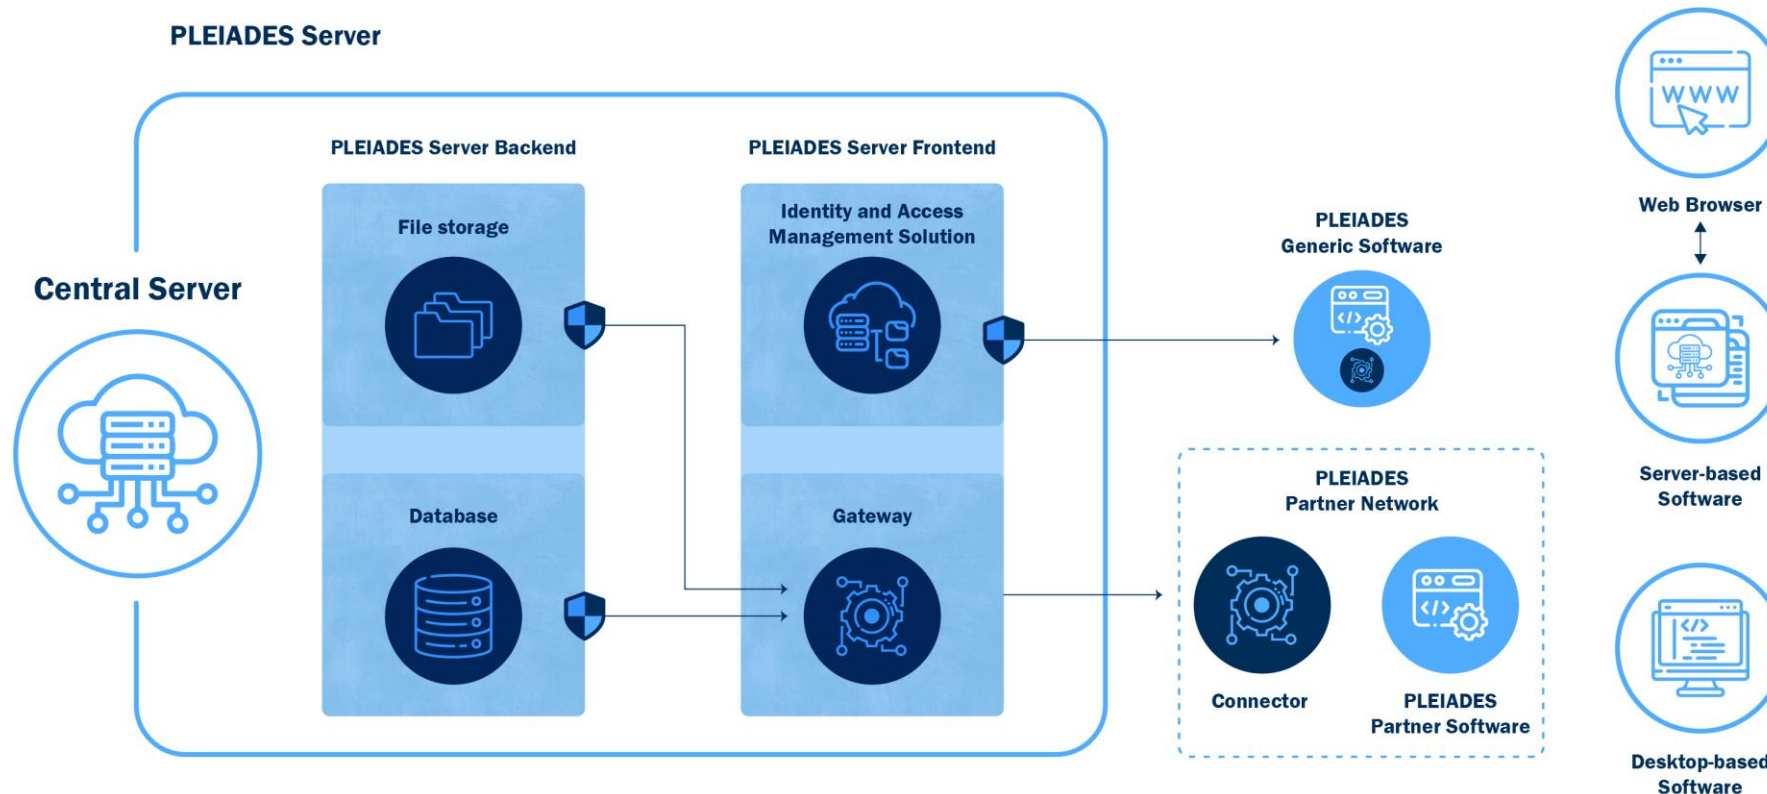

Results:

- Common understanding + data compatibility
- Easier to connect different applications and knowledge base
- Enabling to reuse the vast decommissioning knowledge
- Basis for PLEIADES platform interfaces

PLEIADES Platform

- PLEIADES innovative platform has been specified, developed and tested
- Platform is operational

PLEIADES Platform

→ Platform is **flexible** : SW connection and benefit from common data

PLEIADES DB browser
Version 0.1beta

Digital models

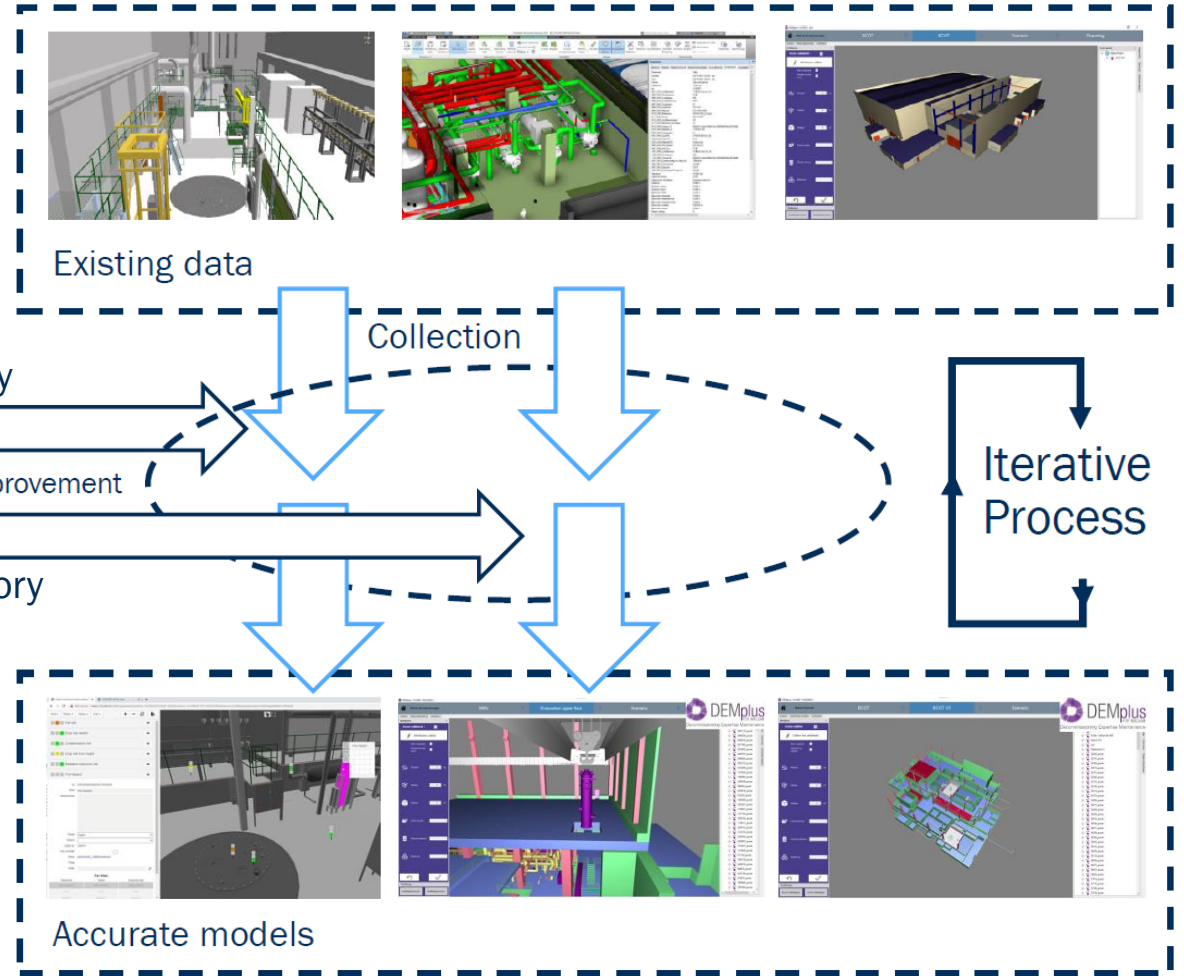

Halden Research Reactor (HRR)

Santa María de Garona (SMG)

Base chaude O. du Tricastin (BCOT)

PLEIADES Demonstration on use cases

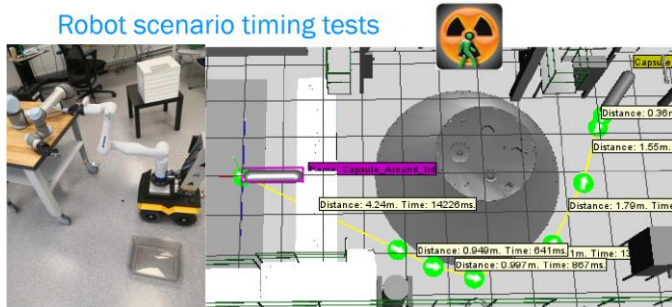

Halden Research Reactor (HRR)

US#1:

Manual vs. remote radiological characterization

Robot scenario timing tests

HVRC VRdose® Results	
Scenario	Dose (mSv)
Disaster (Robot)	
Manual scenario	0.3
Remote / robot scenario	0.338

Santa María de Garona (SMG)

US#2:

3D supported vs. digitally enhanced dismantling

SMG 3D model visualization on DEMplus®

Base Chaude O. du Tricastin (BCOT)

US#3:

Manual vs. automated decontamination of surfaces

Test and results from DEMplus® scenario simulations

US#4:

Strategic risk management planning

US#5:

Regulatory/TSO review capabilities

US#6:

Strategic waste management planning

Steps forward

- Working Group of IAEA, OECD-NEA and EU-JRC: working on ontology for managing the knowledge on decommissioning
Future standardization
- Continue in the development of the ontology and the API:
 - Extend the coverage of the supported decommissioning planning activities
 - Integration of other digitalization technologies like artificial intelligence, robotics or integration with sensor networks.
- Promoting the PLEIADES concept

PLEIADES open workshop today 4pm Special Session
